SOCIAL  
ENTERPRISES  
WITH WOMEN  
GROUPS

13,050

CHF INVESTED

## Working Well

- The model shows that outcomes can be generated, even if they are small. Ananda Women Group increased net income by more than 13% in 2019.
- Safe drinking water stations and water tanks built in ten schools until the end of 2019.

## Learnings

- Reimbursement of investments are difficult, as the infrastructures for generating clean water are usually offered for free by NGOs
- Need of routing the remaining funds to schools, where the project can make a bigger impact by building clean water infrastructures.

## Next steps

- Further water infrastructures in additional schools to be built
